Department of Civil Engineering Sustainable Transportation Engineering Position Assistant or Associate Professor

FACULTY POSITION: The University of Idaho's Department of Civil Engineering, in the College of Engineering, invites applications for a tenure-track position in the area of Sustainable Transportation Engineering. The appointment will be made at the rank of Assistant or Associate Professor depending on qualifications. The position will involve teaching, scholarship, and outreach in UI's Building Sustainable Communities Initiative (BSCI). (<http://www.bioregionalplanning.uidaho.edu/>). This new initiative emphasizes the role of sustainable transportation and development through community outreach and interdisciplinary programs which are supported by a collaborative effort between seven colleges. The outreach task will include working with communities on real world transportation and planning problems.

REQUIRED QUALIFICATIONS: At the time of appointment, applicants must have a Ph.D. in Civil Engineering or a closely related engineering field, expertise in the area of Sustainable Transportation Engineering, an undergraduate degree from an accredited Civil Engineering program, excellent communication skills, and be a registered professional engineer or have the ability to become registered within three years of appointment. The successful candidate will be expected to establish a program of sponsored research; teach; develop undergraduate and graduate courses; and advise students.

DESIRED QUALIFICATIONS: The successful candidate will be expected to support the National Institute for Advance Transportation Technology's research program in transportation planning and/or traffic operations and the BSCI program. Other desired qualifications include: a degree in planning, urban and regional planning, or closely related field; practical experience in industry and/or consulting; leadership in developing and managing research programs; and eligibility for professional certification through the Institute of Certified Planners. We are particularly interested in candidates capable of pursuing multidisciplinary research and educational opportunities with team, both internal and external to the University.

APPLICATION PROCESS: Applicants need to apply online by clicking the "Apply Online" icon at www.hr.uidaho.edu. Applicants must complete the online application and include a letter of application, a narrative describing their teaching and research plans and interests, curriculum vitae, and contact information for at least five professional references. Materials unable to be submitted online may be sent to the Transportation Search Committee, University of Idaho, Department of Civil Engineering, PO Box 441022, Moscow, ID 83844-1022.

CLOSING DATE: For priority consideration, review of applications will begin on January 15, 2008, and continue until the position is filled. The successful candidate is expected to start in August 2008.

ADDITIONAL INFORMATION: The position will be located in the Department of Civil Engineering. With 17 highly qualified faculty members, the department currently serves approximately 215 undergraduate and 70 graduate students with graduate programs located in Moscow, Boise, and Idaho Falls. Information about the Civil Engineering Department, and the College of Engineering, may be found at www.uidaho.edu/engr/cedept/ and <http://www.engr.uidaho.edu/>. The University is located in a spectacular natural setting in North Idaho (see www.visitid.org) which provides a stimulating environment for work and recreation.

To enrich education through diversity, the University of Idaho is an Equal Opportunity, Affirmative Action Employer.
